With Adhd*

A Controlled Evaluation Of Behavioral

CBI indicates combined behavioral intervention. *A patient could discontinue 1 portion of treatment while remaining in another portion (eg, if a patient was assigned to MM plus CBI and he/she discontinued study medication, that patient could continue to attend visits and CBI visits).

Combined Pharmacotherapies and Behavioral Interventions ...

Evidence-Based Behavioral Practice. We create training resources to help bridge the gap between behavioral health research and practice. Professionals from the major health disciplines are collaborating to learn, teach, and implement evidence-based behavioral practice (EBBP).

EBBP - Evidence-Based Behavioral Practice

The blind leading the not so blind: a meta-analysis of blinding in pharmacological trials for chronic pain. Patient blinding is a critical feature of double-blind placebo-controlled randomized controlled trials (RCTs).

Vision therapy (VT) is an umbrella term for a variety of treatments based around eyes exercises. The treatments aim to treat convergence disorder – for which there is supporting evidence – and a range of neurological, educational and spatial difficulties – uses which are not supported by good evidence.. Vision therapy can be prescribed when a comprehensive eye examination indicates that ...

Vision therapy - Wikipedia

Evaluation is a systematic determination of a subject's merit, worth and significance, using criteria governed by a set of standards.It can assist an organization, program, design, project or any other intervention or initiative to assess any aim, realisable concept/proposal, or any alternative, to help in decision-making; or to ascertain the degree of achievement or value in regard to the aim ...
