Catalysis And Automotive Pollution Control

1. Introduction. Commercial applications of catalytic pollution control from internal combustion engines were virtually nonexistent 40 years ago when the first volume of the Journal of Catalysis was published. Today, exhaust catalysts are found on nearly all US passenger cars, light- and medium-duty trucks, and even some heavy-duty trucks.

A catalytic converter is an exhaust emission control device that reduces toxic gases and pollutants in exhaust gas from an internal combustion engine into less-toxic pollutants by catalyzing a redox reaction (an oxidation and a reduction reaction). Catalytic converters are usually used with internal combustion engines fueled by either gasoline or diesel—including lean-burn engines as well as ...

Diesel exhaust fluid (DEF) is an aqueous urea solution made with 32.5% urea and 67.5% deionized water. It is standardised as AUS 32 (aqueous urea solution) in ISO 22241. DEF is a consumable in selective catalytic reduction (SCR) that lowers NO_x concentration in the diesel exhaust emissions from diesel engines. The German Association of the Automotive Industry (VDA) registered the trademark ...

Company Histories. As consumers, we often take for granted all the hard work that goes into building a great company. As business owners, we marvel at how companies have impacted our lives like Apple, Microsoft, and even Hasbro. Finally, we can read about how these great companies came about with company-histories.com. Check out a Tesla!

What Types of Biomedical Engineering Degrees Exist? As with most technical careers, biomedical engineering degrees begin with a B.S. Once the B.S. and any school-specific post-graduate prerequisites are completed, you can apply to a post-graduate program and work toward a master's and eventually a doctorate degree.

CWTS Journal Indicators provides free access to bibliometric indicators on scientific journals. The indicators have been calculated by Leiden University's Centre for Science and Technology Studies (CWTS) based on the Scopus bibliographic database produced by Elsevier. Indicators are available

for over 20,000 journals indexed in the Scopus database.

Either exorbitantly expensive fuel or insanely hot temperatures have made fuel cells a boutique proposition, but now there's one that runs on cheap methane and at much lower temperatures.

Finally, a robust fuel cell that runs on methane at ...

This work is aimed to develop a multicomponent evaporation model for droplets of urea-water solution (UWS) and a thermal decomposition model of urea for automotive exhausts by using the selective catalytic reduction systems.
