### **Color Theory Ready Reference**

The color wheel is a tool for understanding color and color relationships. Think of it as your cheat sheet or "SparkNotes" for color. The most common color wheel and the one that I use is the twelve (12) hue wheel.

### **Get To Know The Color Wheel - Sensational Color**

Color photography is photography that uses media capable of reproducing colors. By contrast, black-and-white (monochrome) photography records only a single channel of luminance (brightness) and uses media capable only of showing shades of gray. In color photography, electronic sensors or light-sensitive chemicals record color information at the time of exposure.

A typical OLED is composed of a layer of organic materials situated between two electrodes, the anode and cathode, all deposited on a substrate. The organic molecules are electrically conductive as a result of delocalization of pi electrons caused by conjugation over part or all of the molecule. These materials have conductivity levels ranging from insulators to conductors, and are therefore ...
