Step 1: Assemble a raised garden frame with 2x12s (or stacked 2x6s to keep costs down) and staple a small-weave mesh to the underside to protect from burrowing pests. I totally unnecessarily used pocket holes for the joints, but a simple butt joint is fine. My garden is 4' x 8', and I don't recommend going wider than 4', otherwise your arches will be too low.

Sunscald injury of plants is easy to prevent, though there is no cure. Once leaves are damaged, all you can do is support the plant until it manages to grow new, stronger leaves. Slower acclimation to bright sun, known as hardening off, is vital to promoting sun resistant leaf development and preventing plant sunburn damage.. For plants already suffering, use a sunshade to restrict their ...

Plants help the environment (and us!) in many different ways: Plants make food Plants are the only organisms that can convert light energy from the sun into food. And plants produce ALL of the food that animals, including people, eat. Even meat. The animals that give us meat, such as chickens and cows, eat grass, oats, corn, or some other plants.
