Introduction to Materials Science and Technology 1.6 U.S. Department of Energy, Pacific Northwest National Laboratory In technology, no one best answer may exist for a given problem. Humans need protection and food, for example. Or they want to move objects from one place to another, or create objects of beauty to be shared and displayed.

### **Introduction to Materials Science and Technology**

Publisher Summary. The properties of materials are defined by the nature of their chemical bonds, their atomic ordering, and their microstructure. Materials are commonly classified according to their most typical properties, such as high mechanical strength, electricity conductors, and permanent magnets.

Materials Science/Introduction. Of all the metallic alloys in use today, the alloys of iron (steel, stainless steel, cast iron, tool steel, alloy steels) make up the largest proportion both by quantity and commercial value. Iron alloyed with various weight percentages of carbon gives low, mid and high carbon steels.
