Non Abelian Harmonic Analysis Applications

This book mainly discusses the representation theory of the special linear group $SL(2, \mathbb{R})$, and some applications of this theory. In fact the emphasis is on the applications; the working title of the book while it was being written was "Some Things You Can Do with $SL(2)$." Some of the

In mathematics, noncommutative harmonic analysis is the field in which results from Fourier analysis are extended to topological groups that are not commutative. Since locally compact abelian groups have a well-understood theory, Pontryagin duality, which includes the basic structures of Fourier series and Fourier transforms, the major business of non-commutative harmonic analysis is usually ...

Noncommutative harmonic analysis - Wikipedia

Harmonic analysis studies the properties of that duality and Fourier transform and attempts to extend those features to different settings, for instance, to the case of non-abelian Lie groups. For general non-abelian locally compact groups, harmonic analysis is closely related to the theory of unitary group representations.

Non-Abelian Harmonic Analysis: Applications of SL (2,?) by Roger E. Howe, Eng Chye Tan |, Paperback | Barnes & Noble®

Abstract harmonic analysis as the harmonic analysis on groups was developed mainly on the basis of the theory of characters of locally compact Abelian groups established by Pontryagin (, see also , ,). Abstract harmonic analysis is one of the natural fields of application of methods of the theory of Banach algebras, and may be regarded as ...
