

## *Progress In Optics Volume 34*

### **Progress In Optics Volume 34**

Optics is the branch of physics that studies the behaviour and properties of light, including its interactions with matter and the construction of instruments that use or detect it. Optics usually describes the behaviour of visible, ultraviolet, and infrared light. Because light is an electromagnetic wave, other forms of electromagnetic radiation such as X-rays, microwaves, and radio waves ...

Vinge's exponentially accelerating change. The mathematician Vernor Vinge popularized his ideas about exponentially accelerating technological change in the science fiction novel *Marooned in Realtime* (1986), set in a world of rapidly accelerating progress leading to the emergence of more and more sophisticated technologies separated by shorter and shorter time intervals, until a point beyond ...

Recent efforts and advances in additive manufacturing (AM) on different types of new materials are presented and reviewed. Special attention is paid to the material design of cladding layers, the choice of feedstock materials, the metallurgical behavior and synthesis principle during the AM process, and the resulted microstructures and properties, as well as the relationship between these factors.

Artificial intelligence (AI) has already demonstrated proof-of-concept in medical fields such as radiology, pathology and dermatology, which have striking similarities to ophthalmology as they are deeply rooted in diagnostic imaging, the most prominent application of AI in healthcare (Jiang et al., 2017).The advantages of AI in medicine are overwhelming.
